Re: Service Availability

Please be advised that Daphne Utilities has the ability to provide utility services at the following location.

Location: 22 Acre Parcel
Northwest Corner of Highway 98 and Dale Road
Daphne, AL 36526

Service Type: Water
Natural Gas
Sanitary Sewer

Notes: It would be the responsibility of the property owner to extend the sewer line to connect to our existing service. A six inch gravity sewer main is located at nearby Dale Road as shown by the orange line on the attached diagram. The yellow circles on said diagram reflect sewer manholes.

Daphne Utilities Natural Gas Service is also available in that area, although our existing main is not on site. Depending on the load, Daphne Utilities would have to perform a cost analysis prior to installation in order to determine if such an extension would be cost effective for the utility.

Sincerely,

Drew Klumpp
Administrative Services Manager
